

Dear AI Leader,

Artificial Intelligence is becoming more and more powerful and versatile with an increasing number of use cases and application fields the European Institute of Innovation and Technology EIT is a key asset in the EU's efforts to promote ai technologies ensuring that they are at the service of all Europeans improving their lives while respecting their rights.

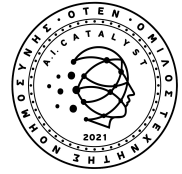

In an effort to coordinate EIT's AI activities and strengthen its position as thought leader on AI in Europe six of EIT's KICs (EIT Digital, EIT Health, EIT Manufacturing, EIT Climate-KIC, EIT Urban Mobility, EIT Food) joined forces in the AI Community. The EIT AI Community focuses on providing decision makers with an instrument to evaluate key concerns and opportunities for ai related issues through a business-oriented perspective. Also, it strives to improve education on AI current challenges by analysing existing educational offerings and emerging skills to derive recommendations for the development of educational programs. In addition, the EIT AI Community is building an EU wide trustworthy open innovation network supporting LE, SME, and Start Up's allowing Innovation and Business creation activities. Overall, EIT AI Community aim to reduce barriers on the way to adopting ai solutions by offering educational products on AI for students and professionals by enabling joint innovation activities between businesses and academia and by nurturing entrepreneurial talent.

For that reason, EIT AI community envisions:

- Establishing a vibrant community of AI stakeholders through a joint roadmap, and building value added relationships between large corporates, SME'S and Start-up's through a series of workshops.
- Proving insights to universities, professionals and decision-makers regarding the raising AI implementation challenges, risks, educational gaps, and opportunities.
- Boosting stakeholder's initiatives impact, engagement and exploitation while thoroughly monitoring, evaluating, and harvesting the results.

For that reason, EIT AI Community aims to create strong synergies towards a participatory quadruple helix ecosystem of AI stakeholders. In that context we would like to invite to be part of EIT AI community and participate in AI activities as a stakeholder/member. The purpose of the following letter of Engagement is to provide substantive information regarding the proposed collaboration and formalize it. Therefore, by signing the attached letter of engagement, you are undertaking a non-binding commitment to be engaged in the EIT AI Community activities in a way that it's most beneficial for you for that reason your participation, and the time involved will depend entirely on your willingness and availability.

Sincerely,  
Orestis Trasanidis  
EIT AI Community Coordinator

To: Mr Orestis Trasanidis  
EIT AI Community

Subject: **Letter of Engagement to the EIT AI Community**

---

Dear Mr Trasanidi,

On behalf of Association of Artificial Intelligence – AI Catalyst I am pleased to provide a Letter of Engagement for the European Institute of Technology and Innovation (EIT) Artificial Intelligence (AI) Community.

Association of Artificial Intelligence – AI Catalyst is a broad network of experts from the Entrepreneurship, Science and Technology world. Its target is to contribute with critical interventions and become the catalyst for the fast transition of Greece to the new era through the digital transformation.

The goals of EIT AI Community are fully in line with our strategy as we focus on raising the awareness regarding the benefits of the developments of AI in the Greek Society and Businesses and the Public Bodies. Furthermore, we wish to build a strong AI ecosystem in Greece.

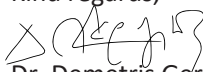

For that reason, we are interested in joining EIT AI Community Advisory Board in order to contribute with our expert advice whenever possible, validate the application scenarios, encourage new business ideas, support the understanding of the business, market and industry trends and propose strategic actions.

We hereby declare our intention to contribute to the activity as a stakeholder/member to the EIT AI Community. We understand that we will be given the opportunity to participate in EIT AI workshops and provide valuable insights, to receive support on leveraging AI and to co-create actions focused on AI in the scope of a joint roadmap aiming to engage in shaping the development of a constructive and inclusive community.

We agree not to disclose any information about this Community without the agreement of the coordinator and to treat any information and material used for the preparation of the activities confidential within the Community

Accordingly, we commit to contribute and to assist the implementation and dissemination activities upon our time and resource availability.

Kind regards,

Dr. Demetris Gerogiannis
